

Connecting Science

Multiple faculty positions for talented researchers in the fields of Chemistry, Computer Science, Mathematics and Physics

Under the name 'Connecting Science', the UvA's Faculty of Science is launching a major recruitment campaign in the areas of Physics, Chemistry, Mathematics, and Computer Science. Our ambition is to attract top talent from all over the world to a large number of newly created faculty positions in a wide range of exciting scientific directions.

At the Faculty of Science, we aim to conduct research with impact on science and society. With the Connecting Science programme we give a boost to this ambition by:

- Attracting top talent in prioritised fields of research
- Creating synergy through connecting disciplines
- Strengthening academic collaboration with partners
- Creating an environment where co-creation with public and private partners can flourish

**For a full overview of vacancies, go to:
www.uva.nl/connecting-science**

For each position, a selection committee will review the applications soon after the application deadline of **15 October 2019**. Shortlisted candidates will be invited for an interview and asked to conduct a public seminar. A second interview could be part of the selection process.
